"AIR for AuroraLurex" is the brand new collection of Manuela Zanvettori ( Murano ) and Aurora ( Vicenza ).

More than a new collection, "AIR" is a new-patented concept of jewels modern and elegant.

"AIR" is the association of traditional Murano blown glass and precious 24 carats gold. The fluffy foils of gold are inserted into the blown glass and creased into gold nuggets.

Once the bubbles are closed the gold floats inside, like moving in the air, playing with the light.

In order to fit everyone's taste,

"AIR" has also been created with silver, copper or mixed foils.

MANUELA ZANVETTORI  
MURANO

All metal parts are in sterling silver 925.

These designs are created with exclusive Lurex® fabrics.

Essential, modern, chic, "AIR" is the perfect alliance of lightness, elegance and prestige.

Our designs are available in several color options.

Lurex fabrics can be rhodium - ivory - golden - rosè ( dune ) - smoke - bronze.

Glasses can be filled with these foils: 24 Kt gold - silver - copper; alone or mixed.

The Candy collection shows its simple elegance through shapes and colours. Both necklaces and bracelets are made with Lurex fabric, 925 silver and original solid glass beads handmade in Murano. Each bead has a coloured base which is craftely covered by trasparent glass to reveal the brightness and purity of its soul. Lurex makes them comfortable, resistant and easy to wear.
